

IMPORTANT INFORMATION ABOUT YOUR WASTEWATER TREATMENT PLANT

Pine Meadows Utilities, LLC

This notice is to inform the residents of Houston Creek Landing and Pine Ridge subdivisions, customers of Pine Meadows Utilities, LLC, there has been an exceedance of total nitrogen in the wastewater discharge due from the dichlorination system. The standard for total nitrogen is based off a rolling annual average with a limit of 8.0 mg/L, the current annual average is 12.61 mg/L. The purchase of material in excess has been made to avoid this problem in the future, and we are confident in this issue being resolved within a couple months. Although this is not an emergency, as residents of the Houston Creek area, you have the right to know what is occurring with the wastewater treatment plant.

The wastewater effluent is routinely tested for harmful contaminants to ensure the safety of the community and surrounding environment. The wastewater treatment plant performance continues to remain in compliance with both ADEQ and environmental standards besides the total nitrogen. For more information, please contact our customer service 888-519-4719 or info@jwwater.net.
